

Read also “Important information when making a fire” before you start.

The Eldfell may have sharp edges so always use gloves when assembling!

Fold out the legs.

Use the locking pin to secure the bayonet pipe.

Put the grate in place.

Put the stove in place. The stove will stand more steadily if it is placed on a couple of poles.

Assemble the chimney.

Place the tray inside the insulation pipe so that the chain sticks out through the topmost line of holes.

Attach the top end of the chain to the bottom of the spark arrester.

Push the chimney up through the opening in the ventilator cap.

Put the chimney sections together.

Adjust the height of the insulation pipe so that the fabric cannot touch the chimney.
